RoHS Compliant

USB Flash Drive
AH322 Specifications

November 26, 2015

Version 1.9
## FEATURES:

- **USB2.0 High-Speed and USB1.1 Full-Speed compatible interface**
- **Capacity**
  - For SLC: 128, 256, 512 MB
  - 1, 2, 4, 8, 16, 32 GB
  - For MLC: 4, 8, 16, 32, 64 GB
- **Performance**
  - Sustained read: up to 34 MB/s
  - Sustained write: up to 22 MB/s
- **Flash Management**
  - Implements advanced wear-leveling algorithms to substantially increase longevity of flash media
  - ECC
- **Temperature Ranges**
  - Operating:
    - Standard: 0°C to 70°C
    - Extended: -40°C to 85°C
  - Storage: -40°C to 85°C
- **Power Consumption (typical)**
  - Active mode: 185 mA
  - Idle mode: 65 mA
  - Operating voltage: 5V
- **RoHS Compliant**
- **Dimensions**: 55.29 x 18.00 x 8.50, unit: mm
- **LED Indicator**
- **EMC**: CE, FCC

---

*The results for performance and power consumption addressed here may vary in real world platforms.*

1. General Description

Apacer’s USB FLASH Drive (UFD) is a high performance flash disk drive designed offering portable storage solutions. UFDs can be plugged into a standard USB 2.0 connector commonly found in desktops, portable computers and even enterprise PC systems. Apacer’s UFDs have an efficient built-in microcontroller and file management firmware that ensures ideal performance, functionality and reliability. This product is well suited for portable flash storage applications while operating at minimal power consumption.

1.1 Performance-optimized USB Controller

The heart of an UDM is the USB controller, which translates standard USB signals to the flash media and controls the data in/out between the controller itself and the flash media. This proprietary USB controller is specifically designed to attain high data throughput from host to flash.

1.1.1 Error Correction Code (ECC)

The UDM uses BCH Error Detection Code (EDC) and Error Correction Code (ECC) algorithms which correct up to 24 random single-bit errors for each 1024-byte block of data.

1.1.2 Wear-Leveling

Flash memory can be erased a limited number of times. In a typical application, and especially if a file system is used, specific pages are constantly updated (e.g., the page that contains the FAT, registry, etc.). Without any special handling, these pages would wear out more rapidly than other pages, reducing the lifetime of the entire flash. To overcome this inherent deficiency, Apacer’s USB-Disk Module (UDM) uses wear-leveling algorithm. This wear-leveling algorithm ensures that consecutive writes of a specific sector are not written physically to the same page in the flash. This distributes flash media usage evenly across all pages, thereby maximizing flash lifetime. The wear-leveling mechanism provides write/erase cycles for reliable data storage over an extended period.
# 2. General Specifications

<table>
<thead>
<tr>
<th>Interface</th>
<th>High-speed USB2.0 compliant; backward compatible with USB 1.1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Performance*</td>
<td>SLC: up to 34 MB/s (read); 22 MB/s (write)</td>
</tr>
<tr>
<td></td>
<td>MLC: up to 33 MB/s (read); 16 MB/s (write)</td>
</tr>
<tr>
<td>Temperature</td>
<td>0 to 70°C</td>
</tr>
<tr>
<td>Shock</td>
<td>Half sine wave 40 G, 11ms / Square wave 100 G, 6ms</td>
</tr>
<tr>
<td>EMC</td>
<td>FCC, CE</td>
</tr>
<tr>
<td>MTBF</td>
<td>2,000,000 hours (SLC) / 1,000,000 (MLC)</td>
</tr>
</tbody>
</table>

*Results may vary from flash configurations or host system settings.

## 2.1 Performance Specifications – SLC

<table>
<thead>

3. Electrical Specification

**Caution: Absolute Maximum Stress Ratings** – Applied conditions greater than those listed under “Absolute Maximum Stress Ratings” may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these conditions or conditions greater than those defined in the operational sections of this data sheet is not implied. Exposure to absolute maximum stress rating conditions may affect device reliability.

Table: Absolute Stress Rating

## 5. Product Ordering Information

### 5.1 Product Code Designations

<table>
<thead>
<tr>
<th>AP</th>
<th>HA</th>
<th>xxx</th>
<th>X</th>
<th>3</th>
<th>X</th>
<th>G</th>
<th>XX</th>
</tr>
</thead>
</table>

- **AP**: Apacer Product Code
- **HA**: Handy
- **xxx**: Solution version
- **X**: Flash Type
  - S: Samsung SLC
  - T: Toshiba SLC
  - C: Micron SLC
  - CM: Micron MLC
- **G**: RoHS Compliant
- **XX**: PCB version

#### Capacities
- 128M = 128MB
- 256M = 256MB
- 512M = 512MB
- 001G = 1GB
- 002G = 2GB
- 004G = 4GB
- 008G = 8GB
- 016G = 16GB
- 032G = 32GB
- 064G = 64GB

#### Temperature
- C: Commercial Temperature
- E: Extended Temperature

#### Model Name
- 1 = AH321
- 2 = AH322
